Good afternoon Bill.

Please find below the email from Town of Cary verifying the requirements of the municipality concerning tree protection and erosion control fencing. As the builder, we have confirmed with the utility contractor that the sewer installation is complete. We will continue the construction of a custom single-family home on the lot at 1537 Jenks Carpenter Road. As we near the end of the project, we anticipate only needing to work in the area near or across your property line if Town of Cary requires any ground stabilization beyond what is currently in place or if there is an unexpected repair required within the sewer easement. Please let us know if you have any additional questions or concerns.

Subject: Re: 1537 Jenks Carpenter - EC and TP fencing

Stacy

Thank you again for reaching out for clarification on this matter. The Town of Cary requires that tree fencing and silt fence be installed on development and/or disturbed areas. These protective measures ensure that sediment, rock, and trash do not leave the project site as well as keep equipment from damaging fences, trees and other features on adjacent properties. The measures must stay in place for the duration of the active construction/ development. These measures are temporary and will be removed at project end. Please reach out if you have any other questions or issues. I have CCed one of our Compliance officials on this email to add more clarification if I've miss anything related to their department.

Sincerely,

Mike D. Thompson, CESSWI, CFM  
Field Services Technician

You don't often get email from [angeconstruction@bellsouth.net](mailto:angeconstruction@bellsouth.net). [Learn why this is important](#)

Good morning Mike,

Thank you for taking my call. I'm writing to request documentation of our conversation concerning the tree protection and silt fencing on the job site at 1537 Jenks Carpenter Road. Have a wonderful day.
